PHOTOGRAPHS:		
- 2566 photographs		
- most photographs include titles; other titles based on images in the photographs		
- all photographs black and white, measuring 4 x 5 unless otherwise indicated		
Looking back through Unimak Pass, Aleutian Islands	June 1906	1.1.1
S.S. Ohio with Nome in distance	June 1906	1.1.2
Unloading passengers on lighters at Nome	June 1906	1.1.3
- published in Bulletin of the Geographical Society, Philadelphia		
- photo missing		
Peculiar pitting looking like solution pits, porphyritic granite, Cape Nome	June 1906	1.1.4
Tundra near crossing of French Ditch over St. Michaels Creek looking south	June 1906	1.1.5
Tundra from same place as view 5, looking north	June 1906	1.1.6
View of St. Michaels Creek tundra fire, 15 feet away	June 1906	1.1.7
Camp just above junction of Osborn and St. Michaels Creeks	June 1906	1.1.8
Large mass of ice covered with dirt at mouth of Anita Creek in Osborn Creek, hammer handle 16"	June 1906	1.1.9
Same place as #9 showing several of the dirt-covered ice masses	June 1906	1.1.10
- published as Plate XIV, Bulletin 533		
Large masses of quartz at locality 6 AS 32 on Flambeau River	June 1906	1.1.11

PHILIP S. SMITH photograph collection

ACCESSION NO.: AINA 1.37 S656

FILE TITLE	DATE	BOX/FILE
Looking south down Flambeau River to show misfit meandering character of course	June 1906	1.1.12
Wild flowers on divide between Surprise and Prospect Creeks, elevation 600 feet, hammer handle 16"	July 1906	1.1.13
Low willows in flower, dwarf variety, from same place as #13 - published in Bulletin of the Geographical Society, Philadelphia	[June 1906(?)]	1.1.14
Earth flows on west side of New Eldorado Gulch	June 1906	1.1.15
Streams issuing from cavern in limestone, east wall of new Eldorado Creek	June 1906	1.1.16
View of Sawtooth Mountains from Limestone Mountain head of Nugget Gulch Divide	June 1906	1.1.17
View of Sawtooth Range from mountain near Sta. 6 AS 105	June 1906	1.1.18
View of earth run scallops on west side of Skookum Gulch	June 1906	1.1.19
Earth flows from between sta's. 6 AS 94 and 6 AS 95 looking toward sta. 97	[1906(?)]	1.1.20
Old stream channels and gravels near loc. 6 AS 122 on Tripple Creek	July 1906	1.1.21
New earth run showing cracks in rear and irregular rolls of earth in front	[July 1906(?)]	1.1.22
Folding in greenstone schist at loc. 6 AS 154, quartz lens in centre of fold	July 1906	1.1.23
Northwest dipping limestone at branch of Fox Creek just above camp	July 1906	1.1.24
Greenstone pinnacle at loc. 6 AS 199 on divide	July 1906	1.1.25

PHILIP S. SMITH photograph collection

FILE TITLE	DATE	BOX/FILE
of North Fork and Fox Creeks		
View of crestline of Sawtooth Mts. from mountain near loc. 6 AS 202 - "Mike"	July 1906	1.1.26
Sheared fold showing limestone and schists. Taken at loc. 6 AS 223 on headwaters of Boldrin Creek	July 1906	1.1.27
Small landslides showing scar and avalanche cone, Boldrin Creek near second stream above loc. 6 AS 225	July 1906	1.1.28
Schist erosion pillar at loc. 6 AS 235 on divide between San Francisco and Bonanza Creeks	July 1906	1.1.29
Delta of Fox and Basin Creeks taken from a point a little east of loc. 6 AS 236	July 1906	1.1.30
Fold in limestone wrapping around greenstone near loc. 6 AS 239	July 1906	1.1.31
Second creek east of Morning Call on north face of Salmon Lake-Bonanza Creek divide - published as Plate [], Bulletin 533	July 1906	1.1.32
Cliffs of limestone about 1300 feet high on north face of 2725' mountain. Head of 1 st stream west of Morning Call	July 1906	1.1.33
Detail view of Grand Central Delta from north - photo missing	August 1906	1.1.34
Fold and horizontal fault in black schists on Fox Creek near sta. 6 AS 264	August 1906	1.1.35
Looking west from pass at head of Fox Creek showing needles and inclined strata	August 1906	1.1.36
Looking east from same point on pass at head of Fox Creek as #36	August 1906	1.1.37
View north from same place as #36 and 37	August 1906	1.1.38

PHILIP S. SMITH photograph collection

ACCESSION NO.: AINA 1.37 S656

FILE TITLE	DATE	BOX/FILE
showing cirque, glaciated valley and Hruzgamepa Flats		
View from same place as #36 and of same subject	August 1906	1.1.39
View of Grand Central Delta from near sta. 6 AS 270 north of Salmon Lake	August 1906	1.1.40
View east along Salmon Lake from near sta. 6 AS 270 on small pinnacle between Fox and Rainbow Creeks	August 1906	1.1.41
Panorama from sta. 6 AS 289 of Sawtooth Range	[August 1906(?)]	1.1.42
- 3 photos		1.1.43
- 6 cm x 27.5 cm		1.1.44
Mount Osborn from sta. 6 AS 289 on divide between Fox and Rainbow Creeks	August 1906	1.1.45
Panorama of Sawtooth Range from loc. 6 AS 283	August 1906	1.1.46
- 3 photos		1.1.47
- 7.5 cm x 28 cm		1.1.48
Case of river migrating on fan on divide between Crater and Grouse Creeks	August 1906	1.1.49
Stone wall on Crater Creek built by down-hill creep of waste	August 1906	1.1.50
Moraine of west fork of Crater Creek near head part frontal and part lateral moraine	August 1906	1.1.51
Dump of dirt on top of ice at mouth of side stream on 1 st creek east of Fox Creek	August 1906	1.1.52
Highest point on divide between Crater Creek and 1 st stream east of Fox Creek	August 1906	1.1.53
Same as #53 showing stratification and steep eastern face	August 1906	1.1.54

FILE TITLE	DATE	BOX/FILE
View upstream from camp at 500' on Grand Central River	August 1906	1.1.55
Willows on Grand Central River at camp at elevation of 500' - photo missing	August 1906	1.1.56
Tumit Creek fan entering Grand Central River just above 500' camp	August 1906	1.1.57
Valley with granite dike dam across lower portion. Second stream tributary to Grand Central River from east north of 500' camp	August 1906	1.1.58
Looking west up most northern mapped tributary to the Grand Central from west	August 1906	1.1.59
Slide on nose of mountain forming north wall of valley of most northern mapped tributary of Grand Central from east	August 1906	1.1.60
Same as #60 and from same place	August 1906	1.1.61
Hanging valley modified by modern stream valley. Small tributary from north to most northern mapped tributary of the Grand Central from the east	August 1906	1.1.62
Clouds at head of Grand Central from camp at elevation of 500'	August 1906	1.1.63
Moraine at mouth of Thompson Creek in Grand Central Valley. Little depressions in the moraine	August 1906	1.1.64
Moraine at mouth of Thompson Creek in Grand Central. (Moffit as scale)	August 1906	1.1.65
Crestline at head of Thompson Creek showing needle-like character	August 1906	1.1.66
View of cirque with ridge separating it from Thompson Creek. Elevation about 1600'	August 1906	1.1.67

PHILIP S. SMITH photograph collection

ACCESSION NO.: AINA 1.37 S656

FILE TITLE	DATE	BOX/FILE
Same as #67 from same place	August 1906	1.1.68
Sawtooth Range from hill beteen[sic] Sinuk and Stewart Rivers	September 1906	1.1.69
Sawtooth Range around "Three Fingers" from hill between Sinuk and Stewart Rivers	September 1906	1.1.70
Faulted fold at loc. 6 AS 448 on Sampson Creek at elevation of 825'. (see notebook 6 AS 2)	10 September 1906	1.1.71
Train on Nome and Arctic Railroad crossing Nome River above Banner Creek	September 1906	1.1.72
View north from head of Green Gulch. Casadepaga Sheet	September 1906	1.1.73
View down Castle Creek showing general character west of Big Four Creek	September 1906	1.1.74
View to show general character of flat table at head of branch of Castle Creek Tributary of Big Four	September 1906	1.1.75
Schist pinnacle on slopes of 1729' hill on divide between No Mans and Elkhorn Creeks	September 1906	1.1.76
Four spruce trees opposite mouth of Richter Creek and the Niukluk	September 1906	1.1.77
View of the Niukluk from opposite Richter Creek. Ophir Creek settlement in distance	September 1906	1.1.78
Elevator and pipe at discovery on Ophir Creek of Wild Goose Company	September 1906	1.1.79
Elevator with icicles at discovery of Wild Goose Company on Ophir Creek	September 1906	1.1.80
Folded and shattered limestone on Ophir Creek ¼ mile above Dutch Creek	September 1906	1.1.81
Mt. Chauik from alluvial fan of creek just	September 1906	1.1.82

PHILIP S. SMITH photograph collection

through ice, 2 miles below winter camp		
Ice bulge near lower end of over-flow lake north of winter camp, shows fractures in dome. Same dome as shown in roll 12-2. (The small white spot on the top of the dome is a ptarmigan)	25 May 1924	5.1.1586
Same dome but showing down stream end rather than the side of the structure	26 May 1924	5.1.1587
Camp for lunch in the brush at lower end of lake. Ptarmigan roasting on spit	26 May 1924	5.1.1588
View from west side of overflow lake north of camp to show the areal distribution of the ice bulges at lower end of the lake	26 May 1924	5.1.1589
View looking across the overflow lake from point ½ mile above the outlet, showing ice bulges near western side	26 May 1924	5.1.1590
View northward, showing outlet of lake and ice bulges near lower and from bank on west side of overflow lake	26 May 1924	5.1.1591
Layered ice at fishing hole north of winter camp. The layers are separated by an air space into which icicles hang down	26 May 1924	5.1.1592
View up open portion of lake at fishing hole, showing over-hanging remnants of ice	26 May 1924	5.1.1593
Lynt and Blankenship fishing with snare near northern end of fishing hole at upper end of overflow lake below winter camp	26 May 1924	5.1.1594
View of hills on east side of south fork valley from winter camp. The distant hills are those between the Alatna and Colville	26 May 1924	5.1.1595
The first bath of the season in running water at winter camp. "Dr. Mertie"	26 May 1924	5.1.1596

PHILIP S. SMITH photograph collection

ACCESSION NO.: AINA 1.37 S656

FILE TITLE	DATE	BOX/FILE
The first bath of the season in running water, at winter camp. "Dr. Mertie"	28 May 1924	5.1.1597
View down stream, opposite camp June 1. From the bubbling of the water, anchor ice is apparently about to rise. Note also pictures 23-1 and 23-5 (1601 and 1605)	28 May 1924	5.1.1598
Hills east of camp June 1 and tributary of Colville near this point	28 May 1924	5.1.1599
Hills west of camp June 1. Cook tent of Dr. Mertie's party in foreground	28 May 1924	5.1.1600
Ice with willow roots beginning to rise, opposite camp June 1	28 May 1924	5.1.1601
Near view of rising ice at camp June 1	28 May 1924	5.1.1602
Later stage. Ice rising short way above camp June 4	1 June 1924	5.1.1603
Large mass of ice rising with considerable noise practically at our feet. Blocks jumping out of the water and milling against each other - published as Plate X B, Bulletin 815	1 June 1924	5.1.1604
Same blocks of ice as shown in preceding view, after they had floated some distance down stream	1 June 1924	5.1.1605
Block of anchor ice rising and shooting up several inches into the air. Prismatic structure plainly evident in left hand portion	1 June 1924	5.1.1606
Side stream west of camp June 1 flowing in trench through ice, not yet cut down to the gravel. Looking up stream	2 June 1924	5.1.1607
View from same place as 24-1 (1607), looking down stream	2 June 1924	5.1.1608
On the bench of a side stream entering from the west near camp June 1 to show almost	2 June 1924	5.1.1609

Eskimo umiak covered with ugruk skin, mounted on boat sled for travel over ice and ferrying over leads. As it stands the load consists of Evinrude motor, two or three cases of gasoline, three or four hundred pounds of camp gear and supplies. This boat was used with load of two men, three or four dogs and several hundred pounds of baggage, making 4 or 5 miles per hour against considerable head wind and sea. - photo by R.M Anderson	June 1916	5.3.1804G
The Teddy Bear working her way through ice around Cape Van Karem - photo by Captain Bernard (?)	1 September 1922	5.3.1804H
Stern of Eskimo umiak braced and stiffened for attachment of Evinrude motor. The motor can be unscrewed or attached in a few minutes' time. Two men can easily beach the boat anywhere. Inflated seal "pokes" are used for rolling the boat up a rough beach. - Bernard Harbour - photo by R.M. Anderson	June 1915	5.3.1804I
